

# WHY SHOULD I USE ACADEMIC WRITER?

## Fewer Errors

- Academic Writer (AW) cuts down on common APA Style errors.
- IWU research shows students who use AW to write papers have fewer errors and earn higher grades than students who do not use AW.

## Automatically Formats APA Style

- AW automatically formats margins, font size, double spacing, and hanging indents.
- AW helps you format in title case and sentence case at the push of a button.
- When you fill out AW's forms correctly, the software automatically returns reference list entries with the proper format: italics, punctuation, etc.

## Learn APA

- AW's Learn feature provides examples, videos, and other tools to help you learn APA Style "quirks."

## OCLS Format Reviews

OCLS Librarians will continue reviewing papers to ensure students use APA Style correctly. However, if you request multiple paper reviews (four or more papers with librarians' feedback), OCLS Librarians can choose not to review your document if you did not use AW to create your paper.
